

## **GSMX Digital Cellular Communicator**

### **Prepare for Today's Communications Challenges**

Are you prepared? The demise of POTS, the emergence of VoIP and the rising number of cell phone-only homes require a cost-effective solution right now. Honeywell's labor-saving GSMX works with VISTA control panels to provide a reliable primary communications path for today's residential consumers—helping to ensure that signals always get through. It's the best way to ensure a reliable communications path for the rising number of cell-only households.
